## DATA PROTECTION SOLUTIONS FOR RETAIL AND HOSPITALITY ENTERPRISES

As processors of highly sensitive customer payment information, retailers and hospitality enterprises face ongoing threats from cybercriminals seeking to steal that data. Breaches of customer records can result in costly notification processes, loss of trust among consumers and compliance violations.

Consequently, organizations must implement stringent security controls that defend against threats while safeguarding sensitive customer data in a compliant manner – all of which can be administratively and financially burdensome.

While many businesses use encryption to protect customer data stored in on-premises databases, data centers and cloud environments, their approach to securing their critical encryption keys can fall short, potentially leaving cardholder data exposed.

Some of the risks facing retail and hospitality organizations include:

- Highly motivated adversaries seek to exploit vulnerabilities and extract valuable cardholder data
- Non-compliance with PCI DSS and other data protection mandates results in financial penalties and potential suspension of credit card processing privileges
- Administrative costs, penalties, reputational damage and increased scrutiny resulting from a data breach

PCI DSS Require- ment	Thales eSecurity Solution(s)
Req. 3: Protect stored cardholder data	Thales payShield Vormetric Application Encryption Vormetric Tokenization Vormetric Transparent Encryption
Req. 4: Encrypt transmission of cardholder data across open, public networks	Thales Datacryptor
Req. 7: Restrict access to cardholder data by business need to know	Vormetric Data Security Manager Vormetric Transparent Encryption
Req. 8: Identify and authenticate access to system components	Vormetric Data Security Manager
Req. 10: Track and monitor all access to network resource and cardholder data	Vormetric Data Security Manager

#### **PAYMENT SECURITY**

Thales payShield hardware security modules (HSMs) and associated management and monitoring tools have been specially designed to meet and exceed industry standards and regulatory requirements for secure card /mobile provisioning and payment transaction processing—and to keep your systems and internal processes flexible and scalable.

Thales payShield HSMs are a key component of mobile point-of-sale and payment processing solutions deployed by our extensive range of industry partners, and help ensure compliance with numerous security standards including PCI DSS, PCI PIN Security, PCI PA-DSS and PCI P2PE.

#### DATA-AT-REST ENCRYPTION

Thales solutions, including the Vormetric Data Security Platform, Vormetric Transparent Encryption and Vormetric Application Encryption provide a single extensible framework for protecting data-at-rest across the broadest range of OS platforms, databases, cloud environments and big data implementations. These solutions deliver low total cost of ownership, as well as simple, efficient deployment and operation.

#### **ENCRYPTION KEY PROTECTION & MANAGEMENT**

Thales offers key protection and management for multiple use cases. The Vormetric Data Security Manager enables centralized management for distributed environments and devices, including KMIP compatible hardware, converged infrastructure stacks, Oracle and SQL Server TDE master keys and digital certificates.

#### **CLOUD DATA PROTECTION**

Thales eSecurity provides cloud encryption and key management solutions that keep enterprises in control of their data. Our partnerships with industry-leading IaaS, PaaS, SaaS and managed services providers mean we can support any cloud strategy - public, private or hybrid.
